WOBURN COLLEGIATE INSTITUTE
SCHOOL SUPPLEMENT TO “CHOICES”
GRADE 10
2010 - 2011 COURSE SELECTIONS

Parents and Students:

Choosing your courses needs to involve a great deal of thought and consideration as it may affect your future plans. To help you with the process of selecting your courses, you will be given “Choices”, a document that outlines information that will assist you with the course selection process. The information in “Choices” is also available at www.tdsb.on.ca. Your parents and teachers will also be asked to make recommendations and you may, of course, speak to any Guidance Counsellor for advice.

Not all courses described in “Choices” are available at Woburn and there are a few available at Woburn that are not described in “Choices”. Thus, this supplement will assist you in making wise, appropriate choices for September 2010.

Please note that throughout the supplement, where an asterisk (*) accompanies a course code, there is a description of that course in this supplement.

- a “6” designation in a course code as the sixth character, is for Gifted programs only; descriptions are contained in a separate Gifted Course booklet
- an “8” designation in a course code is for English as a Second Language/English Literacy Development

Our Student Services Department has counsellors who will assist you in your planning of educational and career goals. Please do not hesitate to consult with them. Have your questions ready for them when they visit classrooms in the next few weeks.

Please take care to make informed decisions that will guarantee school success in 2010 - 2011

WOBURN ADMINISTRATION and
STUDENT SERVICES DEPARTMENT

ANCILLARY FEES

Parents and students should note that some courses have fees attached to them to offset costs specific to the special nature of these courses. These fees are determined by the Department Heads in consultation with the Administration and are reviewed annually.

The Administration will determine the time frame for the collection of these fees with the intent to stagger their collection throughout the year. Should the payment of such fees pose a financial hardship, students should speak with their teacher privately or to a guidance counsellor. Options to a single payment might include payments in instalments or payment at another time or student assistance in lieu of a fee or another suitable arrangement.

YEAR TWO COURSE DESCRIPTIONS

ICS201	<p>Introduction to Computer Science, Grade 10 Open This course introduces students to computer science. Students will plan and write simple computer programs by applying fundamental programming concepts, and learn to create clear and maintainable internal documentation. They will also learn to manage a computer by studying hardware configurations, software selection, operating system functions, networking, and safe computing practices. Students will also investigate the social impact of computer technologies, and develop an understanding of environmental and ethical issues related to the use of computers</p>
ICS20P (problem solving)	<p>INTRODUCTION TO COMPUTER STUDIES – PROBLEM SOLVING GRADE 10 OPEN See ICS201 for general description The emphasis of this course is on problem solving techniques and it is an introductory course to grade 11 and 12 courses that have an algorithm driven approach. Students are challenged with many interesting assignments. They have to apply higher-order thinking skills, and improve their teamwork abilities. The mixture of theoretical approach, hands-on experience and group projects will be offered to you as a student. Students who wish to take our grade 11 and 12 problem solving courses need to take this course.</p>
